Everyone is unique and everyone has unique requirements for their space – whether for work or for leisure, people like their individual needs to be met. This is where the Nowy Styl Group exceeds all expectations, with their extensive portfolio of unique, stylish products for every space.

The Nowy Styl Group’s comprehensive selection of furniture and seating has for years satisfied the needs of clients around the world. We offer solutions for public interiors – schools, offices, cultural, entertainment and sports venues, and for everywhere else, from restaurants to residences.

Considering these diverse needs, Nowy Styl Group sells 3 product brands via differing business models, to different clients and segments of the market. Our products are sold by more than 3,500 distributors in Poland and around the world, with more than 60% of all our production exported to nearly 60 countries on 6 continents.

Diversity of expectation in terms of spatial arrangement is an important challenge in our market, and for more than a dozen years we have been providing clients around the world with increasing possibilities to suit increasingly diverse requirements.

> delivering variety
The basis of our firm’s development is not only attentive monitoring of changes occurring in the market and quick adaptation to evolving circumstances, but also our individual approach to each client and the adjustment of our services to a variety of tastes and expectations.
The global nature of the Nowy Styl Group’s operations and the wide range of our products and flexible manufacturing technologies, allow for comprehensive fulfilment of every project and the meeting of all our clients’ requirements.
Nowy Styl Group around the world

Thanks to its own extensive distribution network, the **Nowy Styl Group offers its products and services to nearly 60 countries around the world.** We can plan, design, produce and deliver comprehensive furnishing solutions in nearly every type of public and private interior to anywhere in the world, all with the same guarantee of high quality.

> The worldwide reach of the Group’s operations, in combination with the wide range of products and technologies, permits the full realisation of every project and meeting every client’s global requirements.

> Both domestic and foreign companies continue to put their trust in us, from internationally recognisable brands to well-known leaders in their own markets. We can simultaneously carry out a comprehensive re-design and delivery of products to an office of 400 workstations in Bucharest, furnish the staff restaurant at the London branch of the same company, and deliver 20 conference chairs to meeting rooms in a Dubai office.

> Our 3 product brands and our special in-house manufacturing technology speak for themselves when it comes to the broad array of challenges we can meet. We provide a complete service for each project from planning, design, purchasing of external elements and production, through to transport, fitting and after-sales servicing.

Quality and guarantees

Nowy Styl Group products’ durability is verified as early as the prototyping stage, in accordance with both the European EN standards and American ANSI BIFMA standards. Additionally, all our production processes are carried out in accordance with the ISO 9001:2008 Quality Assurance System.

To ensure the highest possible European quality, Nowy Styl Group products are first examined at modern research stations in the company’s own research laboratory, and then by independent certifying bodies in Poland and abroad, from where they are issued their quality certificates.

At the individual request of the client, finished products can be examined for compliance with specific standards, and if required, subjected to as much further testing as necessary to attain the required certification.

We provide guarantees on all of our products, in most cases for 2 years.

The attractive design of Nowy Styl Group products is their undeniable advantage. Next is their high quality, as confirmed by some of the highest international standards in the world today.
Design and ergonomics

The aesthetics, functionality and comfort of the furniture that surrounds us has a huge impact on our personal and professional lives. Beautiful furniture adds its own unique feel and character to every interior, and at its best can make our lives much easier.

This is why the Nowy Styl Group attaches so much significance to the design and attractiveness of its products. Nowy Styl Group designers listen first and foremost to our customers. They follow design trends and employ proven ergonomic principles to create furniture ideally suited to the principles of modern interior design, whether for the home or office. Nowy Styl Group products are designed by established designers (Paolo Galeotti, Claudio Bellini, ITO Design, Jerzy Buchacz and Stanisław Charaziak amongst others), as well as those at the beginning of their careers (such as Małgorzata Pękala and Michał Biernacki), and behind all this talent stand the experienced designers of the NS Design Team.

Some of our products are labelled 'Unique Model'. This is an exclusive tag that marks the item as having been developed exclusively for a given brand by a prominent designer.

Each year, we introduce around 100 new seating and furniture designs and around 50 individual designs commissioned by clients. Our designers’ ideas are put into production by a team of more than 18 highly qualified engineers, whose knowledge and experience ensures that all our products, whether they’re new designs from our own teams or custom orders for specific clients, meet the same exacting comfort and quality standards.

Workplace ergonomics involves selection of furniture, chairs and equipment, their appropriate layout and the addition of good lighting to provide comfort, productivity and safety. Because we care about the health of all our products’ users, Nowy Styl Group furniture and seating is designed with health and safety in mind from the first step.

Thanks to their exceptional functionality, our furniture systems enable arrangement of workstations in accordance with key ergonomic principles, and thanks to the variety and functional versatility of all our seating, every user can have a chair adaptable to their dimensions and build, safeguarding their posture and minimising the fatigue of long hours of work.
The Nowy Styl Group takes responsibility for the natural environment. Our company environmental policy includes measures encouraging ecological awareness among all our employees.
Environmental responsibility

As the Nowy Styl Group develops, it’s careful to follow all legal regulations in the sphere of environmental protection in order that its manufacturing has as little impact as possible on the natural environment. This is why one of the principal tasks of the company is the maintenance of environmental policy limiting water, soil and air pollution and production waste.

> The principal ideas behind Nowy Styl Group environmental policy are based on the requirements of the ISO series 14001 standards, which have been confirmed in some of our plants by the appropriate certificates. The Group’s environmental policy is also geared to all external entities – local communities, local and state government and environmental agencies.

> The Nowy Styl Group aspires to the limitation of air emissions and water pollution from the technological processing of wood, metal and synthetic materials.

> Galvanisation waste at our metal production plant is continuously monitored by the factory’s sewage treatment plant.

> Wood used in the production of our furniture comes from controlled cultivation, for which every element of the supply chain has an FSC (Forest Stewardship Council) certificate confirming the legal origins of the wood.

> In our production of elements made from synthetic materials, the share of regranulate manufactured in the recycling process is on the increase. The regranulate obtained from processing waste satisfies more than 70 percent of the requirement for this raw material.

> The Nowy Styl Group also conducts responsible management of post-production waste: wood chips, shavings and sawdust are used in energy generation (heating, fuelling the wood-drying shed etc); metal elements are passed on as scrap metal, and waste from synthetic elements is processed into regranulate.

> In our other production processes, toxic substances such as CFCs, halogenated hydrocarbons (Freon), cadmium, mercury, lead and arsenic are not used. Our varnishing and wood gluing stations fulfil E1 standards concerning low emission of formaldehydes. All Nowy Styl Group production plants are fitted with effective dust removal and filtration systems that capture dust, volatile substances and other pollutants.

> Care for balanced development is also manifested in our staff ecological awareness programmes, which are designed to popularise the ideas inherent in our environmental policy and promote pro-ecological attitudes. In 2008, we launched the 'Be Eco-Logical' educational program for all our employees.

> For more information, visit www.nowystylgroup.com and see the section about the group nowy styl / social responsibility.
The Nowy Styl Group is one of the most dynamically developing furniture companies in the world. Originating in Poland, it is now a global sales and distribution force.

- The company was founded in 1992 with a team of 7 and just 3 chairs in the catalogue.

- Eighteen years on, the Nowy Styl Group is an European leader and one of the world’s largest producers of office furniture and chairs for all purposes. Most of the components in our products originate from our own plants, which process metal, wood and synthetic materials, in accordance with ISO 9001:2008 standards. Some of our plants also hold ISO 14001:2004 certificates.

- Currently, the Group’s portfolio includes 3 product brands: Nowy Styl, BN Office Solution and Forum Seating.

- Thanks to this comprehensive commercial offer, we can satisfy the expectations of clients both in Poland and abroad with our wide range of safe, comfortable, high quality products.

- Despite our products going out to tens of millions users around the world, we never fail to forget our responsibility towards the environment.

- For many years now, the Nowy Styl Group has been pursuing a deliberately pro-ecological policy in the most important areas of production, as well as a policy of social responsibility towards its employees, clients, and society as a whole.

- We have won numerous awards for our products, our company and our social involvement. A list of our awards can be found at www.nowystylgroup.com in the nowy styl group / awards section.
The Nowy Styl Group is an European leader and one of the world’s largest manufacturers of furniture and chairs for various uses. The broad offer and comprehensiveness of the three product brands focused on particular business models, and their functioning in different market segments allows us to meet the expectations of every client.
Nowy Styl is a comprehensive and extensive offer of chairs and armchairs for private and public interiors. Quality and functionality with a balanced price mean that the products enjoy lasting success among a wide range of clients.
1 > Securities Exchange, Warsaw, Poland. Samba chairs.

2 > Pub Whispers, Manufaktura, Łódź, Poland. Žeta bar stools.

3 > Serafi Mega Mall, Jeddah, Saudi Arabia. Medea chairs.

4 > Erzsébetligeti Theatre, Budapest, Hungary. Loco II chairs.

5 > Formula Line. Study armchair and conference chair.
Nowy Styl is the oldest brand in the portfolio of the Nowy Styl Group.

Products of the Nowy Styl brand are created with the diverse needs of our clients in mind. Thanks to the wide offer and the balanced relations of quality, functionality and price, they satisfy the tastes of clients throughout the world.

The variety of products in Nowy Styl’s offer makes it possible to use them in different types of interiors: offices, conference halls and waiting rooms, restaurants and residential buildings.

The Nowy Styl collection consists of over 200 design lines of seats and chairs available in around 100 upholsteries, and also tables and other elements of interior furnishings, making Nowy Styl’s the largest and most comprehensive range of chairs in Europe.
1 > Vienna chairs, Tuscany table.

2 > Hotel Crocus, hotel room, Zakopane, Poland.
Florence armchairs.

3 > Hotel Best Western Premier, restaurant room, Cracow, Poland.
Florence chairs.

4 > Hotel Crocus, restaurant room, Zakopane, Poland.
Lisbon chairs.

5 > Cesare Restaurant, Cracow, Poland.
Cracow chairs, Tuscany tables.

6 > Hotel Crocus, lounge bar, Zakopane, Poland.
Florence armchairs, Lisbon bar tables.

Prior to undertaking cooperation, we try to thoroughly investigate the nature of our clients’ business and the specificity of their industry.

> Based on this information, our highly qualified and experienced team prepares designs that create a modern work environment. In preparing the design, we listen carefully to our clients’ suggestions. We pay attention to the functional layout of rooms, and the potential of space. Our advisors propose optimal furniture solutions, taking into account the principles of ergonomics and comfort.

> An indispensable element of a project is visualization of the space design. We prepare photorealistic visualizations of interiors, which allow easier presentation of the client’s vision.

> Our installation-servicing teams take care of professional installation, and make sure that projects are completed in a timely manner.
Oxford Aviation Academy, United Kingdom. Commercial pilot training college. Oscar armchairs in the auditorium and in the flight simulation room.
Seating systems for demanding audiences

Forum Seating is a comprehensive offer of chairs for stadiums, cinemas and auditoria, providing for the furnishing of the grandstands of sports and spectator venues, cinema and theatre halls, university lecture halls, and many other public venues.

1. “Atlas Arena” Sports and Performance Hall, Łódź, Poland. The grandstands can hold 10,400 spectators, and an additional 3000 seats can be set up on the floor. Vision and Visio chairs with headrests, Oscar armchairs in the grandstands, press boxes and VIP grandstands.

2. Teatr Nowy, Zabrze, Poland. Oscar armchairs.

3. Silesian University of Technology, Gliwice, Poland. A technological university established in 1945. Oscar armchairs in the main hall.

4. Track and Field Stadium SVK Beiertheim, Karlsruhe, Germany. Omega Low Back chairs in the grandstands.

5. Mbombela Stadium, Nelspruit, Republic of South Africa. 40,000 Omega High Back chairs installed in the grandstands.
The realization of each venue is treated by the Forum Seating brand as a separate, individual project. This involves work with the architect, investors and the construction company. For us, each project is a process, we are together with our clients from the design stage all the way up to the delivery and installation of the chairs, in any place in the world.

The chairs are made with the use of modern, well tested technologies combined with the Group’s many years of experience. Thanks to this, very large projects are successfully realized for the most demanding clients. All Forum Seating products have passed the relevant tests and have the appropriate certificates. They also meet the requirements of international and domestic football federations: PZPN, FIFA, UEFA.

We have great respect for the effort and hard work that our clients put into their investments in the construction and modernization of public venues. Our goal is to provide both our clients and investors with an optimal solution. Experienced specialists are in place to assist the choice of right models of chairs and the overall planning of the layout of these chairs and seats so that they meet the strict requirements of building codes and standards for sports venues.

We ensure a professional guarantee and a post-guarantee service, and our experienced installation team will quickly and skillfully complete the installation process.
Products of Forum Seating give public venues a unique character, being often entirely responsible for their functionality, comfort and safety.

1 > Leicester Square Theatre, London, United Kingdom. The newest London theatre, located in the centre of the West End. Oscar armchairs.

2 > PostFinance Indoor Arena, Bern, Switzerland. Sigma chairs in the spectator grandstands.

3 > Skating rink KS Cracovia, Cracow, Poland. The artificial, covered skating rink of the major league hockey team Cracovia, Cracow. Sigma chairs in the grandstands for spectators.

4 > City Sports and Recreation Centre "Spodek", Katowice, Poland. Vision chairs and Oscar armchairs were installed during the modernization of part of the indoor arena.
Seating systems for demanding audiences
The Nowy Styl Group has its own tool shop, Design and Implementation Centre and a modern, largely digitally controlled machine park for the processing of wood and metal and the treatment of synthetic materials. This is how nearly all the subassemblies necessary for the production of chairs originate in partner companies belonging to the firm.

- In all of the Nowy Styl Group plants production takes place in accordance with the ISO 9001:2008 Quality Assurance System. In most plants, a system of environmental management has been introduced based on ISO 14 001 standards.

- For more information visit www.nowystylgroup.com the technology section.
Tools

A strong team of people prepare the tools needed by the plants which manufacture the Group’s furniture and chairs, as well as for special orders.

- Production encompasses tools of various degrees of complexity, dimensions and weight. To create them, we use modern stations for spatial modelling and design, and also digitalization and 3D surface reconstruction.

- Every year, the plant prepares over 30 injection moulds and over 250 presses and cutters, as well as welding and drilling tools according to the needs of other members of the Nowy Styl Group.
The Nowy Styl Group has machines for processing furniture boards: panel ripsaws for cutting the boards, veneer machines for one- and two-sided narrow surfaces (PVC and ABS 0.5–3 mm edgebanding), CNC machines for milling, drilling and curved-line veneering. We also have at our disposal a department for manufacturing veneer elements with natural veneers with a varnishing room.

Construction elements from leading producers are used in the products we manufacture (desks, cabinets, accessories and others). By request of the contracting party, they can be selected according to individual requirements.
Woodworking

The production of bent and glued elements and solid wood takes place in digitally controlled, multi-axis processing centres that provide for almost unlimited modelling possibilities. Elements of varying degrees of complexity are formed, intended for products of the Nowy Styl Group and for the completion of special projects.

The Nowy Styl Group belongs to a small group of producers offering veneers in all three quality classes. The company also has an automated varnishing line.

The plant’s production potential and quality control at every stage of wood processing guarantee the consistently high quality of products and diligence in executing even very large orders.
Metalworking

Large and small metal elements for furniture and chairs are produced in the metal-processing plant.

- The company has at its disposal presses from 10 to 400 tonnes, automated welding, soldering, bending and planning stations, as well as other highly specialized stations (for example, a fully automated polishing robot).

- Computer-controlled galvanization processes (3 chromium plating lines) and varnishing guarantee the optimal adhesion of the chrome and varnish coating. This is why the metal elements are highly resistant to scratching and have a long-lasting aesthetic appearance.
Plastics processing

In production from elements made of synthetic materials, we use the latest solutions and techniques, allowing us to lower the manufacturing costs – for example, by using a method of gas injection and also the use of regranulate from recycling.

The elements produced are subjected to thorough inspection in the factory research laboratory, with regards to the parameters of plasticity and durability.

With a wealth of experience in colouring elements, the Nowy Styl Group offers them at the request of the contracting party – in the full RAL colour palette.
Upholstering

The company upholsterers skilfully combine a craftsman’s precision with the requirements of large scale production.

Thanks to many years’ experience of working with high quality fabrics of varying weaves and the highest quality leathers, microfibre and mesh fabrics, they have the ability to realize diverse orders, including those using non-standard materials provided by the client.
Individual projects

Besides the product offer of the 3 brands, it is also within the competency of the Nowy Styl Group to render services in the area of special individual projects. Cooperation with the group in this sphere enables the creation of added value for both parties, while maintaining the distribution models of individual brands and market segments. Within the framework of individual projects, the Group manufactures subassemblies or whole products for manufacturers from different industries.

> Special projects ordered by the Group's clients are realized strictly according to their guidelines. A completely new product is prepared for our clients – from the design, through prototype construction, to the introduction of the production series and the delivery of the product to anywhere in the world as indicated by the client – in addition, just one of the stages for the creation of a new product can be realized (for example, producing the prototype).

> The Group supports its clients in the realization of even the most non-standard orders, guaranteeing consultation of high class engineers – technologists and designers – and ensuring the perfect construction of the tooling necessary for the introduction into production of the selected items or the complete product as commissioned by the client.

The technology used in the Group’s plants enables the versatile processing of wood and metal, and also the production of elements made from synthetic materials. The Group’s production potential guarantees its flexibility and diligence in the realization of commissions, even in the execution of very large orders.

> Special projects, like the standard products manufactured by the Nowy Styl Group, are made in accordance with the guidelines set by European EN standards and American ANSI BIFMA standards, and will conform to any specialized standards as indicated by the contracting party. Production takes place in accordance with the standards of the ISO 9001:2008 Quality Management system.

> The quality and consistency of the Group’s products is monitored in our own research laboratory and in independent research centres, using the latest generation of equipment that facilitates measurements and aids in designing products and their components.

Thanks to the Group’s many years of experience, it additionally ensures its contracting parties:

**preparation of the documentation** necessary to obtain the required certificates, even in cases which require the most specialized standards;

**packing of the products** into specially designed containers/boxes, and also marking them with the information of the final client;

**dispatching of products** to anywhere in the world as indicated by the contracting party.

> The entire process of implementing a special project is carried out individually for each client.

> The Nowy Styl Group realizes many unusual, individual projects, leading to the market success of its partners.
